WHEREAS City employees, including law enforcement, encounter stray or abandoned pets from time to time; and

WHEREAS the City is not equipped to house or rehome pets for periods exceeding five days; and

WHEREAS it is in the best interests of the City and its citizens to provide for the safe and humane care of abandoned pets within the City.

NOW THEREFORE City and Shelter agree as follows:

I. TERMS

1. Shelter’s Obligations.

- a. Shelter agrees to accept any and all pets (to include cats and dogs other than pit bull breeds) referred to Shelter by City staff, including but not limited to law enforcement. Once received by Shelter, Shelter will provide humane care for all such pets in the same manner as any other animal it cares for, at Shelter’s sole expense. Shelter agrees to accept referred pets from City at any time during Shelter’s normal business hours.
- b. *Professionalism.* Shelter will exercise the care and skill ordinarily used by members of the subject profession practicing under similar circumstances (as defined by the appropriate licensing authority, professional standards, and/or relevant industry practices). - iii. If Shelter is using a company-owned vehicle to perform any obligation herein, Automobile Liability insurance with a limit of \$1,000,000 for each accident, combined single limit for bodily injury and property damage.

Upon request by the City, Shelter shall cause City to be named as additional insured for all such policies; except that nothing contained in this section, or the balance of this document, shall be construed to broaden the liability of the City beyond the provisions of R.S.Mo. §§ 537.600 or 537.610, nor to abolish or waive any defense at law which might otherwise be available to the City or its officers and employees.

e. *Licenses, Permits, Taxes.* Shelter must have or obtain a City merchant's license. The purpose of this report is to request approval to move forward with a feasibility study for a potential multi-sport venue in Osage Beach. This project was budgeted for in our 2025 planning cycle.

Process and Recommendation

We issued a request for proposals and received responses from eight qualified consulting firms. Together with two other members of our management team, we reviewed each proposal in detail. All three of us unanimously agreed that Victus Advisors LLC is the right consultant for this project.

Victus' original estimate was \$65,000. Through our review process and discussion, we negotiated the cost down to \$58,000. While this is \$3,000 greater than the original budget of \$55,000, we have favorability in the Training & Conferences and Community Event Support budget lines that will cover the additional need.

Based on their expertise, approach, and proven track record, my recommendation on behalf of the City is to move forward with Victus Advisors to complete the multi-sports venue feasibility study.

Why Victus Advisors

- **Independent and objective.** Unlike the other seven consultants, Victus does not design, build, or operate facilities. Their only role is to give us an honest read on demand, feasibility, and community impact without pushing development we do not need.
- **Phased approach.** Victus is one of the only firms that proposed a two-phase structure, giving us a clear go or no-go decision point after Phase 1.
 - **Phase 1 (\$30,000):** Quantitative and qualitative studies, research, stakeholder interviews, and data collection to assess whether the project should move forward. If the findings show the project is not viable, we are not obligated to continue to Phase 2.
 - **Phase 2 (\$28,000):** Site evaluations, economic and fiscal impact analysis, funding options, and a final recommendation.
 - Expect to complete Phase 1 & 2 in 3.5 months.
- **Strong Midwest track record.** Victus has completed more than 200 sports venue studies nationwide, including multiple projects in Missouri and the surrounding region.
- **Community and market focused.** Their process uses surveys, focus groups, and benchmarking to ensure that recommendations reflect both local needs and broader trends.
- **Financially disciplined.** They develop operating models, visitor projections, and

long-term impact studies that evaluate hotel nights, visitor spending, tax revenue, and funding sources.

- **Results we can measure.** Their work has consistently led to projects that deliver measurable economic and community benefits.

How the City Will Use the Feasibility Study

The feasibility study will give us clear, actionable answers that we can use to guide decision-making on a potential multi-sport venue in Osage Beach. Specifically, the study will help us:

- **Understand demand.** Identify which sports are underserved in our region and measure the appetite for tournaments, leagues, and recreation so we can align investment with real needs.
- **Define the right type of facility.** Determine whether the best fit for Osage Beach is an indoor or outdoor venue, single-sport or multi-sport, or a flexible-use design that serves both residents and visitors.
- **Evaluate competition.** Benchmark against other facilities in Missouri and surrounding states to see where Osage Beach can stand out as a sports and tourism destination.
- **Build a financial model.** Establish a realistic plan for funding and operations, including the balance of public and private contributions, sponsorships, naming rights, and projected revenues.
- **Measure economic impact.** Project both the direct revenues and the indirect tourism and tax revenues the facility could generate, giving us a clear picture of return on investment for the community.

In short, this study provides the facts we need before committing to a project of this size.

Strategic Framing

A multi-sport development is not just about recreation. It is about economic resilience. It directly supports two of our biggest goals:

- Reducing dependency on summer-only tourism by creating new year-round demand.
- Growing Osage Beach's role as a regional hub for commerce, culture, and events.

If framed correctly, this project positions Osage Beach not only as the "Heart of the Lake" but also as a year-round destination for families, sports, and events.

In short:

- **Does it fit in the economic development plan?** Yes. It diversifies our economy, improves resident quality of life, and strengthens our regional positioning.
- **Can it be a revenue generator?** Yes. Both directly through events and rentals, and indirectly through increased visitor spending and sales tax revenue.

- **Can it bring tourism in off-peak periods?** Yes. That is one of the strongest benefits, filling winter and spring gaps when lake-driven tourism is low.

We also followed up with two client references, both of whom gave very favorable feedback on their experience working with Victus. **Amy Schneider, Columbia MO CVB, and Alana Cooper, President & CEO of the Monroe–West Monroe CVB**, each noted that Victus delivered excellent customer service, stayed on time and on budget, and provided financial modeling that has proven accurate against actual results. Both confirmed they would hire Victus again for a similar project.

EXHIBIT A
2025 AMENDMENT

**2025 AMENDMENT TO THE
ARROWHEAD CENTRE TAX INCREMENT FINANCING PLAN**

CITY OF OSAGE BEACH, MISSOURI

Background: On June 24, 2015, the Tax Increment Financing Commission of the City of Osage Beach, Missouri (the “TIF Commission”) held a public hearing regarding the Arrowhead Centre Tax Increment Financing Plan (the “Original Redevelopment Plan” and as amended herein, the “Redevelopment Plan”) and the “Redevelopment Projects” described therein. The Redevelopment Plan applies to an approximately 226-acre “Redevelopment Area” that includes the property of the former Dogwood Hills Golf Course, as shown on the map attached hereto as **Exhibit A**. As described in the Original Redevelopment Plan, the Redevelopment Area was divided into eight “Redevelopment Project Areas” (each, an “RPA”) so that tax increment financing (“TIF”) and the Redevelopment Projects could be initiated on a phase-by-phase basis as development occurred in the Redevelopment Area.

On July 16, 2025, the Board of Aldermen of the City of Osage Beach, Missouri (the “City”) adopted Ordinance No. 15.56 approving the Original Redevelopment Plan. Ordinances initiating tax increment financing in each RPA and approving the Redevelopment Projects for each RPA were introduced at the July 16, 2015 Board of Aldermen meeting and were tabled with the intent of being taken up for final passage at a later date.

On February 18, 2016, the Board of Aldermen adopted Ordinance No. 15.57 initiating TIF in “RPA I” and approving the Redevelopment Project for RPA I. Arrowhead Senior Living was subsequently developed within RPA I. Accordingly, the maximum term of TIF in RPA I is February 18, 2016 through February 17, 2039 (i.e., 23 years).

On June 17, 2025, the Board of Aldermen adopted Ordinance Nos. 15.58, 15.59, 15.60, 15.61, 15.62, 15.63 and 15.64 initiating TIF in and approving Redevelopment Projects for “RPA II,” “RPA III,” “RPA IV,” “RPA V,” “RPA VI,” “RPA VII” and “RPA VIII,” respectively. Accordingly, the maximum term of TIF in RPAs II - VIII is June 17, 2025 through June 16, 2048.

The purposes of this amendment are:

1. Consolidate RPAs II - VIII into a single “RPA II” as shown on **Exhibit B** attached hereto. Because RPAs II - VIII have the same term, consolidating these RPAs into a single RPA will make administration of the TIF area more simple. Moreover, given the limitations in Section 99.810, RSMo., there is no longer any legal ability to initiate TIF on a phase-by-phase basis in RPAs II - VIII.

2. Allow the Redevelopment Projects described in the Original Redevelopment Plan for each of RPAs II - VIII to be developed anywhere in the newly consolidated RPA.

*Revisions to
Plan:*

1. The references to “eight” Redevelopment Project Areas in the first full paragraph on page 2 of the Original Redevelopment Plan are replaced with “two.”
2. The definitions of the Redevelopment Projects II – VIII on pages 11-12 of the Original Redevelopment Plan are hereby amended to include all such Redevelopment Projects in Redevelopment Project II.
3. The definitions of the Redevelopment Project Areas II – VIII on pages 12-14 of the Original Redevelopment Plan are hereby amended to consolidate such Redevelopment Project Areas into Redevelopment Project Area II.
4. The descriptions of the Redevelopment Projects II – VIII on pages 25-26 of the Original Redevelopment Plan are hereby amended to include all such Redevelopment Projects in Redevelopment Project II. Furthermore, for purposes of clarity, references to approximate numbers of units, square footages and specific uses are intended for illustrative purposes. Specific uses, square footages and unit counts of Redevelopment Project components will be subject to market demand, zoning and other governmental approvals associated with the development of real property. However, to qualify for tax increment financing assistance under the Redevelopment Plan, such uses must be generally consistent with the institutional, residential, recreational, retail and office uses described on pages 2-3 of the Original Redevelopment Plan.
5. The Schedule of Development on pages 26-27 of the Original Redevelopment Plan will be revised to reflect that development within the newly consolidated RPA II is anticipated begin in 2026.

Department Comments and Recommendation:

The Midwest Blue Oval Club is hosting an all-Ford car show to benefit local charities at the Inn at Grand Glaize on October 24-25. We are looking for local sponsors to help with this show.

First, a little about the Midwest Blue Oval Club. Our Club was founded in 2014 as a 501(c)3 organization for the express purpose of promoting all-Ford car shows to benefit local charities in cities where they are held. All the people it takes to put on these

shows (this is our fourth show this year) are volunteers. We pay for our own lodging, meals and travel expenses. We do take a small percentage right off the top of the show net income to pay for our insurance, office supplies, trailer, and equipment upkeep. Since the Club was incorporated, we have donated almost \$160,000 to local charities.

This show, the Blue Oval Color Fest, will be a two-day event. Friday, October 24, will be dedicated to cruises around the Lake of the Ozarks general area. The car show portion of the event will be at the Inn at Grand Glaize on Saturday, October 25, from 8:00am until about 3:00pm.

Attachment 2

There really is no budget for this car show. The venue is being provided free of charge by The Inn at Grand Glaize. The only expense we have is for our insurance, office supplies and maintenance on our equipment. This is funded by the Midwest Blue Oval Club. We take 10% from the net proceeds to cover these expenses. Our organization is run by a totally volunteer group. We pay our own travel expenses, lodging, meals, etc. We even pay to enter our own cars into the show.

The proceeds come from local businesses which help sponsor the event, and from the participants who enter their vehicle into the car show.

We are still pursuing sponsorship, but we currently have some sponsorship from Big O Tires in the amount of \$300 and Stonecrest Book and Toy for \$100.

If you need more information, please don't hesitate to contact me.

Thanks,

Al Rutherford-President

Budget Line Information (if applicable):

Department Comments and Recommendation:

Causes for the change order include: 1) design changes after award of the project to the contractor; 2) City Engineer and Design Engineer should have rebid the project after design changes and/or the realization that the gas main was not yet relocated which is the City's responsibility to make happen before notice to proceed; 3) City and Design Engineer were often non-responsive and Contractor was not disciplined about official "requests for information" to gain clarity; 4) flaws in design and subsequent field

decisions by City Engineer and/or Design Engineer resulted in cost increases. The City will be reimbursed by Alpha Engineering for work performed to the benefit of their property in addition to the scope of the project in the amount of \$12,363.40. In addition, for flaws in design and due to errors made in project management, the City will hold payments for services rendered by Cochran Engineering in the amount of \$68,085.24.

CITY OF OSAGE BEACH.
FIXED ASSET
POLICIES AND PROCEDURES

PURPOSE & SCOPE

Recording fixed assets is necessary for the following reasons: 1) to provide for physical and financial control and 2) to provide accountability for general government capital expenditures over the years.

It is the City's policy to: Record and handle as a fixed asset all expenditures meeting the definition criteria below, to do a physical inventory of these items every five years, to properly retain acquisition and disposition documentation, to identify by tagging fixed assets where possible, to follow proper procedure when disposing of fixed assets and to depreciate assets controlled by the proprietary funds.

PROCEDURES

DEFINITIONS

A fixed asset is tangible in nature, has a "useful life" longer than two years and a minimum value of \$5,000. Fixed assets may include gifts and donations, expenditures for material and parts, and labor costs to assemble, fabricate or construct the asset.

A controllable asset is tangible in nature; has a "useful life" longer than two years, and minimum value of \$1,000 up to \$4,999. These assets are not capitalized on the general ledger nor are they depreciated, but they are tracked by each department. Each department is responsible for maintaining a list of controllable assets and make it available for review upon request by the City Administrator or City Treasurer's department.

A fixed asset cost is the historical cost including the purchase price before trade-in or discount, cost of construction, professional fees, site preparation, freight, shipping and installation costs incurred to place the asset in use.

CLASSIFICATION OF FIXED ASSETS

All fixed assets of the City, within the scope of the above policy, are to be capitalized based upon the following classifications:

Land

This classification encompasses all land acquired by the City. Capitalized costs include land acquisition, documentation, and costs to prepare land for use. Land has an indefinite life and is not depreciated.

Buildings

This classification encompasses all buildings acquired by the City. Buildings are defined as structures to house equipment, services and functions. Capitalized costs include the cost to build or the market value at the time of acquisition, architects' and engineers' fees, renovation costs, permits, insurance during construction, interest during construction and other administrative costs such as appraisals and documentation fees.

In addition to the cost of the building, fixtures should be included as part of the building valuation. Fixtures are items which become an integral part of the building, even though the cost might not have been included as part of the original construction contract.

Examples of fixtures are listed below:

Kitchen counters, walk-in boxes and shelving;
Bleachers and fixed gymnasium equipment;
Graphics;
Carpeting;
Compressed air systems when piped into the building;
Emergency generators unless used only for emergency operations of fixed equipment or other services not relating to the lighting or power of the building.

Infrastructure / Land Improvements

Attachments to the land that have limited lives and therefore are recorded separately and are depreciable: streets, curbs, gutters, sidewalks, bridges, water/ sewer main and distribution lines, radio transmitting towers, signage, paving, fencing and gates, parking lots, driveways, irrigations systems, athletic fields, golf course, swimming pools and tennis courts, and lighting

Equipment

All movable equipment such as athletic equipment, business machines, communications equipment, police and fire equipment, machinery, tools, trailers and heavy equipment such as tractors, bulldozers, skid steers, excavators, backhoes, street sweeper, jetter vac, dump trucks. Motor vehicles such as cars, pickups, buses, and motorcycles. Major hardware items such as mainframes and larger printers.

Construction In Progress

Costs for projects not completed in the year begun are tracked over the time needed to complete the job and then capitalized at the time the project is placed into use.

If construction costs are funded in part or in whole by a debt instrument, interest paid on said debt prior to the asset being recognized (booked) shall be capitalized as part of the construction.

ESTIMATED USEFUL LIFE

Useful life will be estimated in accordance with the Governmental Accounting Focus - Estimating useful lives for capital assets (Exhibit A).

GENERAL RECORDING POLICIES

Individually Controlled Assets

The assets should be recorded by make; model and serial number and include any other relevant identifying information such as size, capacity and material.

The City will not include the following items as capitalized assets:

1. Easements
2. Landscaping, except when it constitutes an integral part of the facility function
3. Spare parts
4. Records and plans
5. Discarded equipment
6. Supplies and other expendable materials
7. Lumber, pipe and other materials stored for future use

PHYSICAL INVENTORY

To ensure the integrity of the City's list of fixed assets, a physical inventory will be carried out no less than every five years. This may be accomplished in increments; however, all City departments will be covered at least once every five years. This accounting of assets is the joint responsibility of the City Treasurer and the respective department managers.

In addition to the physical inventory, records of all fixed assets will be provided annually to each department director. It is the department manager's responsibility to review these lists to ensure that items contained therein are still being used and in their department's control.

RECORDS RETENTION

Missouri state statutes stipulate that records retention for subdivisions of the state will be performed in accordance with the Missouri Municipal Records Manual. This document should be referred to with any questions relating to the retention of records documenting the acquisition or disposition of fixed assets.

TAGGING

It is the City's policy to tag fixed assets for identification and control whenever "reasonable and practical". A permanent tag bearing the asset identification number will be affixed to each respective asset.

DISPOSITION

All sales of City property shall be made by competitive bid whenever possible. When any City property is to be disposed of, that disposition must be approved by the Board of Aldermen. To accomplish this and facilitate further action, departments will submit to the Assistant City Administrator all information available regarding each item to be disposed of. This should include but not limited to description, year, make, model and serial numbers, asset tag number, etc.

DEPRECIATION

Fixed assets will be depreciated annually using the straight-line method.

Fixed Assets (Rev 10/2025)

Financial Policy – Capital Assets

This policy is to establish the principles related to the accounting treatment of our capital assets.

Capital assets include lands, improvements to lands, buildings, building improvements, vehicles, machinery, equipment, infrastructure, construction in progress and all other tangible assets that are used in operations and have initial, useful lives extending beyond a single annual reporting period. Infrastructure assets are long-lived capital assets that normally are stationary in nature and can be preserved for a significantly greater number of years than most capital assets. Examples of infrastructure assets include roads, bridges, tunnels, drainage systems, water and sewer systems, and lighting systems.

Land and land improvements are inexhaustible capital assets and will not be depreciated. Construction in progress will not be depreciated. All other capital assets will be depreciated over their estimated useful lives, as established by the City Treasurer, using the straight-line method of depreciation.

A capitalization threshold is the cost established by the City Treasurer that must be met or exceeded if an asset is to be recorded and depreciated as a capital asset. The capitalization threshold is based on the cost of a single asset. Assets that do not meet the capitalization threshold will be recorded as expenses. For purposes of property control, the Department Heads will develop and maintain the appropriate record-keeping systems to account for assets/inventory which do not meet the capitalization threshold.

Capital assets that meet the minimum capitalization threshold will be recorded at cost on the date of acquisition, or for assets gifted to the City, fair value on the date of donation will be recorded. The cost of a capital asset includes capitalized interest and ancillary charges necessary to place the asset into its intended location and condition for use. Ancillary charges includes costs that are directly attributable to asset acquisition, such as freight and transportation charges, site preparation costs and professional fees.

Capital assets associated with the operation of enterprise funds will be recorded in those funds. Capital assets associated with general government operations will be recorded in the governmental activities column.

Department Comments and Recommendation:

The park road paving project realized significant savings earlier in 2025 which left over \$200,000 in the Park Improvements line item. The Parks Department requested permission to seek bids for a new playground for Peanick Park during the 09/18 BOA meeting. The top three playgrounds were selected by a playground committee and made available for a public vote via social media from 10/08 – 10/12. Please see the attached playground renderings which will go to the public vote. The Parks Dept. is now seeking permission to move forward with purchasing a new playground for Peanick Park. I do recommend approval and am happy to answer any questions you might have.
